# Moses Githinji

## FullStack Developer

Experienced fullstack developer using JavaScript frameworks like ReactJS, ExpressJS, NodeJS and NextJS to build web apps. A firm believer in mobile-first responsive web design with close to two years of experience using the web technologies mentioned above.

Graduate of Mount Kenya University with a degree in Actuarial Science

## Experience

○ August - November 2023

### Mechanic Locator

This is an Android and iOS application whose main objective shall be that of connecting motorists with reputable garages anywhere in the country. All a motorist has to do is download the app from their respective stores, register and start using it. The application keeps track of the motorists location and then returns only garages that are closest to their current location.

**STACK: React Native & MongoDB, React Native Maps**

○ Jan 2022 - Aug 2022

Kiambu Water | Kiambu town, Kiambu County

### Web Developer

- . I upgraded the old website to a new and modern website.
- . I also added a customer's portal to enable their customers keep tabs with the statuses of their accounts.
- . I deployed the website to Hostinger and incorporated an SSL Certificate to ensure the site was secure, as per Google's recommendations.
- . I integrated their website with the G-Mail platform from Google, which was what they used in their old website and thus ensuring smooth transition.
- . I also added admin capability to the website's backend and by doing so, the company's IT manager was able to add content into the website on a per requirement basis.

○ Jan - April 2023

KejaYangu | Nairobi Kenya

### Fullstack Developer

- . Designing wireframes for a real estate website.
- . Designing the mockups and final designs on Figma.
- . Designing the API layer for the real estate website, that is, the users and admins layers of the API. Built using NodeJS, ExpressJS & MongoDB with Mongoose
- . Building the UI of the website using ReactJS.
